UPDATE

PERFORMANCE ONE

Solid growth in H1 22,
outlook becomes cloudy –
BUY rating confirmed

What's it all about?

Performance One had a solid top-line development H1 2022, as the company was able to win numerous new customers. We assume that these customers offer the potential to contribute to the company's growth in the long term. For the moment, management switches to the conservative scenario released in spring. Consumer sentiment in Germany has reached new lows and visibility for the important Christmas business is currently not given. Against this backdrop, we adjust our estimates and also reduce the price target. However, in the long term, Performance One will benefit from the structural shift towards digitalization, which is why we continue to recommend to BUY with a new price target of EUR 20.00 (old EUR 26.00).

BUY (BUY)

Solid growth in H1 22, outlook becomes cloudy – BUY

Top-line outpace the market. Performance One has reported preliminary figures. In H1 2022, the company continued its growth trajectory, increasing revenues by 11% to EUR 5.9m and again outperforming the market growth (CAGR 20-25E +9%). This development was driven by the acquisition of new customers such as Wüstenrot, Würth, Hays and the expansion of existing customer relationships. Likewise, the two new products, the e-mental health platform couch:now and the business intelligence software BIGNITE, made a small but growing contribution to the development. Final figures will be published at the end of November.

Source: Company data, AlsterResearch

EBITDA remains negative, but improvement expected in H2 22. In H1 22, Performance One reported EBITDA of EUR -0.9m, widening the loss compared to the previous year's figure (EUR -0.4m). For the second half of the year, management expects an operational improvement as 1) cost saving measures have already been implemented, 2) one-off charges will no longer apply and 3) business activities seasonally pick up with Q4 and lead to economies of scale.

Bloomberg PO1:GR

Market development and outlook: The current recession fears and global macro headwinds are not bypassing Performance One. Tech giants like facebook announced massive job cuts last week as the overall industry's growth momentum slows. However, pure-play digital marketing players are less affected than the overall advertising industry, as performance-driven marketing offers a more precise targeting and the advertising impact is usually directly measurable. This enables a much more efficient use of resources, for example to keep customer acquisition costs low. Nevertheless, even this sector of the industry cannot escape an economic slowdown. Therefore, the company expects sales between EUR 11.0 - 12.0m and EBITDA between EUR -0.8 - 0.0m, thus confirming the lower forecast from the cautious, conservative scenario published in spring. The baseline scenario envisaged an increase in sales to EUR 13.0-14.0m and EBITDA in the range of EUR 0.0 to EUR 0.5m for fiscal year 2022.

Company description

Performance One AG is a German-based digital solutions provider. Its products and solutions are data and artificial intelligence (AI) driven, that help in digitalizing marketing and sales strategies. In its new business activities, Performance One offers data analysis services and develops business intelligence software called BIGNITE as well as an online platform for psychological counseling named couch:now.

Conclusion: Performance One had a solid first half year 2022 and was able to win numerous new customers. We assume that among these, up to ten customers have been acquired that have key account potential and will thus contribute to the company's growth in the long term. For the moment, we appreciate management's cautious approach of switching to the conservative scenario. Consumer sentiment in Germany has reached new lows and visibility for the important Christmas business is currently not given. Against this backdrop, we adjust our estimates and also reduce the price target. However, in the long term, Performance One will benefit from the structural shift towards digitalization, which is why we continue to recommend to BUY with a new price target of EUR 20.00.

Company background

Products & services

Performance One – In a nutshell

Performance One AG is a digital marketing agency and offers a broad package of AI driven services. The company offers the full range for digital transformation and strategy in marketing and sales. Performance One is a consulting and implementation company that creates, manages, and designs digital experiences and products for brands, companies, and people. This includes strategy development, digital marketing, and data analytics which together are the core services. These products and services, called Digital Services, represent the core activities of the group, and represent almost 100% sales in 2021. In recent years, the company turned its activities towards data-driven, innovative solutions which are the connecting element today and build the foundation for a scalable business model. These activities are summarized under the term Innovation Products.

Company structure separates Digital Services and Innovation Products

Performance One operates with two business units, which are **Digital Services** and **Innovation Products**. In addition, the company works with different brands for different topics and services. Headquartered in Mannheim, Germany, the company employs 114 people.

Performance One overview – Business units, brands, products and services and end-markets

Digital Services

The group's corporate brand is **PERFORMANCE ONE**. For the different topics of communication/ products and services, the company uses five brands: BRAIN, HEART, DIALOG, TOUCH and PERREK.

- BRAIN – Focused on smart data consulting and specialized on data science as well as data analytics.
- TOUCH – Concentrating on cloud and automation services as well as digital performance
- HEART – Specialized on creative services and human experiences and emotions
- DIALOG – Stands for performance and digital marketing
- PERREK – Core service is performance recruiting

Performance One's – core business: performance marketing

What is performance marketing?

Performance marketing comprises the implementation, evaluation, and optimization of advertising measures with clearly measurable performance. Based on the data, the efficiency of the individual advertising measures can be precisely analyzed and adjusted to reach the pre-formulated key performance indicators accordingly. In online marketing, this type of advertising works particularly well, as all measures carried out, from large advertisements to individual social media posts, can be analyzed and adjusted, if needed.

Overview of important elements of digital marketing

Source: AlsterResearch

Bread and Butter-Business: Digital Services

Performance One's bread and butter business is digital performance marketing of all types. Search engine optimization (SEO), search engine advertising (SEA), display advertising or social media advertising are just examples, as Performance One offers holistic digital marketing solutions, consulting, implementation, measuring and services in this area.

Defined areas of relevance covered by Performance One are:

- E-Business (Infrastructure, Software)
- E-Commerce
- Digital Communication
- Data, Research and AI
- Customer Experience
- Social Media
- Search
- Ad-Tech
- Digital Transformation/Strategy
- IoT
- Platforms

The company uses all common platforms (from Google to Facebook and LinkedIn to Amazon) to satisfy the requests of its own customers. This includes classic digital marketing, brand and customer experience, technology, automation and cloud solutions, digital personnel marketing as well as smart data and AI solutions that determine the success of marketing campaigns.

Sales structure in 2021

Source: Company data, AlsterResearch

In 2021, all revenues were generated with Digital Service activities. There are two major revenue streams: 75% are fees and services, while 25% are generated via media budgets. These are marketing services that are purchased in bulk from platforms, for example, and then passed on to the Performance One customer with a mark-up margin. The recently established Innovation Products segment has not made any significant contribution to group revenues until today.

Innovation Products: **BIGNITE** and **couch:now**

With the product-brands **BIGNITE** and **couch:now**, Performance One markets two software-as-a-service (SaaS) application. For both, the market entry took place in 2021 and the services are currently being rolled out. The significance of these offerings is expected to grow due to the Software-as-a-Service business model, which comes along with secured recurring revenues, high scalability, and a diversification from current project business. Both applications were developed in-house and programmed, using internal and external resources. Common and widespread programming languages were used to allow easy integration and, if necessary, to easily implement a change from external resources.

B2B-Kicker: BIGNITE - a business intelligence solution via SaaS

The service BIGNITE was developed in cooperation with the University of Mannheim and is marketed as cloud-based solution. The core of BIGNITE is based on artificial intelligence (AI) that provides the data for smart business decisions independently of the business, product, or industry. For this purpose, forecasts are derived from the existing data of Performance One and customer-specific data of all kinds, which depict future demand. This helps Performance One's customers to use marketing budgets more efficiently. In other words, when demand at a client is high, (performance) marketing measures are scaled back, and resources – mostly money - are saved. If the capacity utilisation and demand is (too) low, on the other hand, higher marketing efforts can be used to ensure better capacity utilisation / higher demand / more orders, leading to higher sales and earnings, respectively.

The SaaS-business model has many advantages for Performance One. SaaS solutions can usually be implemented quickly and easily in existing customer structures. Therefore, the willingness to purchase is high if a corresponding benefit is immediately visible. After that, the subscription models ensure regular and predictable revenues for Performance One. And after a one-time implementation at the customers, the switching costs and with its willingness to change are usually very low.

B2C-Kicker: E-Mental-Health platform: couch:now

couch:now is a digital platform that offers psychotherapeutic self-help and counseling. The platform and its content were created in collaboration with universities, doctors, and therapists. The offer is sorted by topics which can be accessed by everyone. The market entry took place already, and the subjects 'couple counseling' and 'loneliness' are online available. Other therapeutic topics and addiction counseling are expected to follow soon.

For the time being, private customers are addressed. Performance One currently aims to be certified by the ZPP – Zentrale Prüfstelle Prävention as digital prevention application. With this licensing, the offerings on couch:now would be actively offered by health insurers and patients would be eligible for reimbursement. This would ultimately increase the acceptance rate at customers which would then significantly increase the addressable market. As the approval process started already, an certification could take place in early 2023.

couch:now: A cooperation with professionals, experts and two universities

Distribution, clients and resellers of couch:now

Currently, customers include just German-speaking and tech-savvy users who book a course of their choice. Performance One is aiming for a health insurance reimbursement for the individual courses. In addition, health insurers should also request the offer in order to place it among their own insurance holders. The next step of distribution is B2B marketing: Companies could provide the courses to their employees as part of employee retention and disease prevention programs. Sales launch was in August and first customers were won already. In the mid-term, the fourth pillar of growth is the internationalization of the content through adopting to country specifics such as different languages.

Management

	
<p>Denis Lademann Co-Founder and Member of the Board, CEO since 2009 (year of foundation)</p>	<p>Tobias Reinhardt Co-Founder and Member of the Board CEO since 2009 (year of foundation)</p>

Shareholders

The 1,057,524 shares of Performance One have been listed in the m:access segment of the Munich Stock Exchange and on the Frankfurt Stock Exchange since May 2022. Since September, the stock is also traded on Berlin stock exchange. The inclusion of trading in the XETRA segment is in preparation, and a listing could follow in H2 2022.

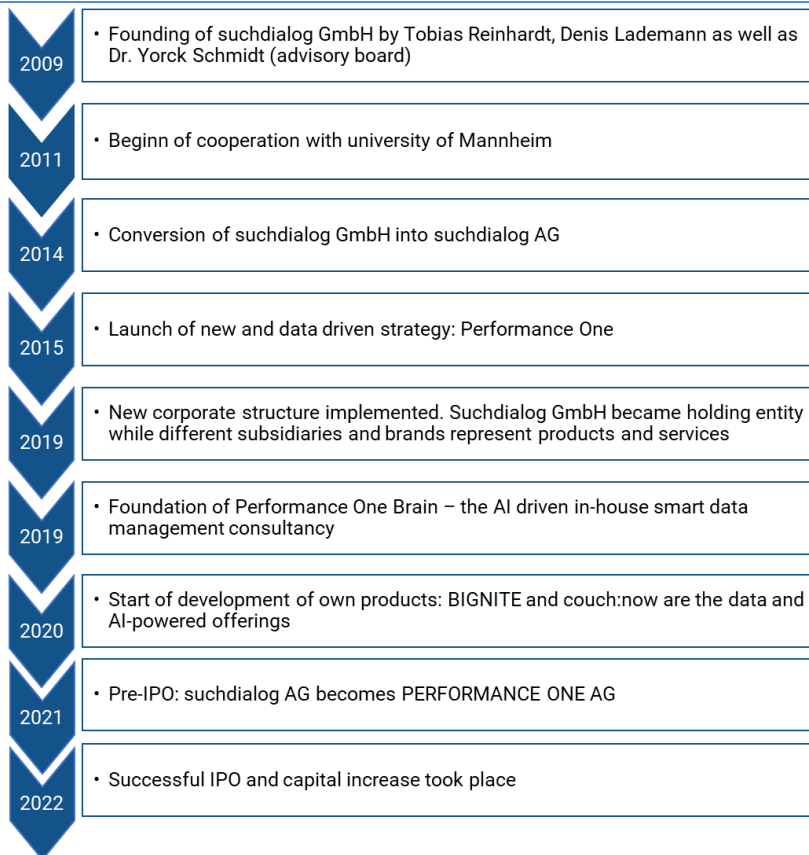

On a positive note, in addition to the supervisory board and management (together hold +60% of shares outstanding), employees also hold shares of the company. Therefore, the complete team has an incentive to deliver performance, which is aligned with investors. In the current times of a shortage of skilled workers, this is an interesting incentive for the workforce and an even stronger signal to employees and investors. As further institutional investors are involved, the free float is just 10%. The shareholder structure since the IPO is as follows:

Porter's five forces

To summarize the competitive landscape and Performance One's positioning herein, a Porter's Five Forces has been conducted. The result is displayed below:

Fragmented market leaves ample room for specialized players like Performance One

Source: AlsterResearch

SWOT analysis

Strengths

- Proven track-record with well-known Blue-Chip clients (>150 clients)
- Balanced client portfolio across several industries
- Experienced management team
- Management and workforce are incentivized via share program
- Agility and flexibility due to a lean organizational structure and a generally asset light business model
- BIGNITE is the USP-service which is being rolled-out
- couch:now is a strongly scalable B2C business model
- Revenue streams become more diversified and less cyclical due to implemented SaaS business model - increasing share of recurring revenues

Weaknesses

- As of now, fees and service revenues from Digital Services represent almost 100% of sales and are mostly project based which occurs with several risk factors
- Sales of digital services are partly performance and success-dependent
- High fixed cost base due to labor costs
- Steady need of technical innovation / development and hence IT costs

Opportunities

- Offered AI-driven Software-as-a-Service (SaaS) should meet market requirements of steady data analysis to derive fast management decision
- High sales growth opportunities with existing and new customers
- SaaS model is appealing and interesting for smaller customers, due to lower ramp-up costs and reduced integration barriers
- Growing demand for digital solutions in all industries
- Successful approval of couch:now by The Federal Institute for Drugs and Medical Devices enables reimbursement at health insurances

Threats

- Marketing budgets are among the first to be cut in times of economic downturn
- Fight for talents in field of IT and marketing
- Copycats: Digital players could try to adopt the business model
- Overall high market rivalry due to broad competition – fragmented market
- Marketing often only works via strong platforms such as google, facebook and amazon, which are known to have a strong market position

Valuation

DCF Model

The DCF model results in a **fair value of EUR 19.97 per share**:

Top-line growth: We expect Performance One to continue benefitting from structural growth. Hence our growth estimates for 2022E-2029E is in the range of 21.1% p.a. The long-term growth rate is set at 2.0%.

EBIT margins are expected to recover after one-off cost for IPO and capital increase. In addition, margins should be supported by the roll-out of the SaaS activities (15% eAR). Therefore, group margins should reach higher levels compared to pure advertising activities (5% eAR). On group level, margins are expected at c. 10% in the mid-term.

WACC. The averaged 1-, 3- and 5-year historical equity beta is calculated as 1.50. Unlevering and correcting for mean reversion yields an asset beta of 1.16. Combined with a risk-free rate of 2.0% and an equity risk premium of 6.0%, this yields cost of equity of 14.2%. With pre-tax cost of borrowing at 5.0%, a tax rate of 25.0% and target debt/equity of 1.0 this results in a long-term WACC of 9.0%.

FCF Yield Model

Due to the fact that companies rarely bear sufficient resemblance to peers in terms of geographical exposure, size or competitive strength and in order to adjust for the pitfalls of weak long-term visibility, an Adjusted Free Cash Flow analysis (Adjusted FCF) has been conducted.

The adjusted Free Cash Flow Yield results in a fair value between EUR 0.09 per share based on 2022E and EUR 43.17 per share on 2026E estimates. **Our DCF based PT is best captured using the 2024 estimates.** It thus supports the DCF based fair value calculations.

The main driver of this model is the level of return available to a controlling investor, influenced by the cost of that investors' capital (opportunity costs) and the purchase price – in this case the enterprise value of the company. Here, the adjusted FCF yield is used as a proxy for the required return and is defined as EBITDA less minority interest, taxes and investments required to maintain existing assets (maintenance capex).

FCF yield in EURm	2022E	2023E	2024E	2025E	2026E

Source: Company data; AlsterResearch

Simply put, the model assumes that investors require companies to generate a minimum return on the investor's purchase price. The required after-tax return equals the model's hurdle rate of 7.0%. Anything less suggests the stock is expensive; anything more suggests the stock is cheap. **ESG adjustments might be applicable, based on the overall Leeway ESG Score. A high score indicates high awareness for environmental, social or governance issues and thus might lower the overall risk an investment in the company might carry. A low score on the contrary might increase the risk of an investment and might therefore trigger a higher required hurdle rate.**

Conflicts of interest

Disclosures regarding research publications of SRH AlsterResearch AG pursuant to section 85 of the German Securities Trading Act (WpHG) and distributed in the UK under an EEA branch passport, subject to the FCA requirements on research recommendation disclosures. It is essential that any research recommendation is fairly presented and discloses interests of indicates relevant conflicts of interest. Pursuant to section 85 of the German Securities Trading Act (WpHG) a research report has to point out possible conflicts of interest in connection with the analyzed company. Further to this, under the FCA's rules on research recommendations, any conflicts of interest in connection with the recommendation must be disclosed. A conflict of interest is presumed to exist in particular if SRH AlsterResearch AG

- (1) or its affiliate(s) (either in its own right or as part of a consortium) within the past twelve months, acquired the financial instruments of the analyzed company,
- (2) has entered into an agreement on the production of the research report with the analyzed company,
- (3) or its affiliate(s) has, within the past twelve months, been party to an agreement on the provision of investment banking services with the analyzed company or have received services or a promise of services under the term of such an agreement,
- (4) or its affiliate(s) holds a) 5% or more of the share capital of the analyzed company, or b) the analyzed company holds 5% or more of the share capital of SRH AlsterResearch AG or its affiliate(s),
- (5) or its affiliate(s) holds a net long (a) or a net short (b) position of 0.5% of the outstanding share capital of the analyzed company or derivatives thereof,
- (6) or its affiliate(s) is a market maker or liquidity provider in the financial instruments of the issuer,
- (7) or the analyst has any other significant financial interests relating to the analyzed company such as, for example, exercising mandates in the interest of the analyzed company or a significant conflict of interest with respect to the issuer,
- (8) The research report has been made available to the company prior to its publication. Thereafter, only factual changes have been made to the report.

Conflicts of interest that existed at the time when this research report was published:

Company	Disclosure

Important disclosures

1. General Information/Liabilities This research report has been produced for the information purposes of institutional investors only, and is not in any way a personal recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by SRH AlsterResearch AG, exclusively to selected recipients [in DE, GB, FR, CH, US, UK, Scandinavia, and Benelux or, in individual cases, also in other countries]. A distribution to private investors in the sense of the German Securities Trading Act (WpHG) is excluded. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of SRH AlsterResearch AG. Reproduction of this document, in whole or in part, is not permitted without prior permission SRH AlsterResearch AG. All rights reserved. Under no circumstances shall SRH AlsterResearch AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report – neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.

2. Responsibilities This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analyzed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.

3. Organizational Requirements SRH AlsterResearch AG took internal organizational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of AlsterResearch AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.

4. Information Concerning the Methods of Valuation/Update The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made. The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate. The operating cash flow is calculated as EBITDA less maintenance capex and taxes. Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjustment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value. Detailed information on the valuation principles and methods used and the underlying assumptions can be found at <https://www.alsterresearch.com>.

SRH AlsterResearch AG uses the following three-step rating system for the analyzed companies:

- **Buy:** Sustainable upside potential of more than 10% within 12 months
- **Sell:** Sustainable downside potential of more than 10% within 12 months.
- **Hold:** Upside/downside potential is limited. No immediate catalyst visible.

NB: The ratings of SRH AlsterResearch AG are not based on a performance that is expected to be "relative" to the market.

The decision on the choice of the financial instruments analyzed in this document was solely made by SRH AlsterResearch AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of SRH AlsterResearch AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies.

5. Date and time of first publication of this financial analysis
14-Nov-22 11:22:51

6. Risk information

- Stock exchange investments and investments in companies (shares) are always speculative and involve the risk of total loss.
- This is particularly true in respect of investments in companies which are not established and/or small and have no established business or corporate assets.
- Share prices may fluctuate significantly. This is particularly true for shares with low liquidity (market breadth). Even small orders can have a significant impact on the share price.
- In the case of shares in narrow markets, it may also happen that there is no or very little actual trading there and that published prices are not based on actual trading but have only been provided by a stockbroker.
- In such markets a shareholder cannot expect to find a buyer for his shares at all and/or at reasonable prices. In such narrow markets there is a very high possibility of manipulating prices and in such markets there are often considerable price fluctuations.
- An investment in shares with low liquidity and low market capitalization is therefore highly speculative and represents a very high risk.
- There is no regulated market for unlisted shares and securities and a sale is not possible or only possible on an individual basis.

7. Major Sources of Information Part of the information required for this research report was made available by the issuer of the financial instrument. Furthermore, this report is based on publicly available sources (such as, for example, Bloomberg, Reuters, VWD-Trader and the relevant daily press) believed to be reliable. SRH AlsterResearch AG has checked the information for plausibility but not for accuracy or completeness.

8. Competent Supervisory Authority SRH AlsterResearch AG are under supervision of the BaFin – German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), Graurheindorfer Straße 108, 53117 Bonn and Marie-Curie-Straße 24 – 28, 60439 Frankfurt a.M. This document is distributed in the UK under a MiFID EEA branch passport and in compliance with the applicable FCA requirements.

9. Specific Comments for Recipients Outside of Germany This research report is subject to the law of the Federal Republic of Germany. The distribution of this information to other states in particular to the USA, Canada, Australia and Japan may be restricted or prohibited by the laws applicable within this state.

10. Miscellaneous According to Article 4(1) No. i of the delegated regulation 2016/958 supplementing regulation 596/2014 of the European Parliament, further information regarding investment recommendations of the last 12 months are published free of charge under <https://www.alsterresearch.com>.
